510(k) history	62 submissions · 62 cleared · 1976-1994

The Perkin-Elmer Corp. is a scientific instrumentation company based in McHenry, US. The company specializes in analytical and characterization technologies for laboratory and industrial applications. The company has received FDA 510(k) clearances from total submissions, with no denied submissions on record. Its regulatory history spans from 1976 to 1994, with a primary focus on toxicology and chemistry devices. Notable cleared devices include atomic absorption spectrophotometers, inductively coupled plasma emission spectrometers, liquid chromatography pumps, and gas chro...
