Decision	Substantially Equivalent (Cleared)
Submission type	Traditional
Device classification	Instrumentation, High Pressure Liquid Chromatography (LDM)
Date received	Feb 5, 1981
Decision date	Feb 25, 1981
Days to decision	20 days
Third-party review	No

APPLICANT

Company	The Perkin-Elmer Corp.
Location	Mchenry, IL, US
Website	https://www.perkinelmer.com
510(k) history	62 submissions · 62 cleared · 1976-1994

The Perkin-Elmer Corp. is a scientific instrumentation company based in McHenry, US. The company specializes in analytical and characterization technologies for laboratory and industrial applications. The company has received FDA 510(k) clearances from total submissions, with no denied submissions on record. Its regulatory history spans from 1976 to 1994, with a primary focus on toxicology and chemistry devices. Notable cleared devices include atomic absorption spectrophotometers, inductively coupled plasma emission spectrometers, liquid chromatography pumps, and gas chro...
